

LIP BALM PEPTIDE LIPS®

 The image shows a black tube of PeptideLips lip balm and its corresponding box. The tube is labeled 'PeptideLips' and 'БАЛЬЗАМ ДЛЯ ГУС С ПЕПТИДАМИ'. The box also features the brand name and a list of benefits in Russian. The website 'e-peptide.com' is visible at the bottom right of the image.	❖ Decorative Peptide Cosmetics ❖ Lip balm ❖ PEPTIDE LIPS® Vendor code: 61004 BUY LIP BALM
Description	
Once applied, this lip balm with peptides brings a sense of comfort to the lips. Quickly removes the feeling of tightness and dryness. Smoothes, regenerates and moisturizes lips. Accelerates healing of dry skin cracks. Slows down the aging process. Helps to eliminate irritation. Protects lips from changes in temperature and fluctuations in humidity. Easy to apply on the lips and prevents against inflammatory diseases and has UV-protection. Lip balm PeptideLips® Your smile will shine with beauty and health! Contains peptides - from vessels and thymus.	
Benefits:	
• contribute to the development of antioxidant enzymes in the body and interferon, • strengthens capillary walls, • improves microcirculation and tissue trophism, • provides regenerating, trophic, immunostimulatory effects, • speeds up the recovery of soft tissue, • UV-protection, • protects against harmful effects of the environment, • prevents from inflammatory diseases, • prevents from chapped lips, • prevents possible inflammation (a reaction to smoking, lipstick or prolonged exposure to the sun).	
Ingredients	
peptide complexes A-3, A-6, mineral oil, polybutene, isononyl izononanoat, a copolymer of ethylene and vinyl acetate, isostearyl alcohol, polyethylene, polybutene, mineral oil, petrolatum, candelilla wax, carnauba wax, bioantioxidant complex "Neovitin"®, mica,	

titanium dioxide, silver oxide, aroma flavor.
Application method:
Apply directly to the lips. Perhaps several times during the day. In order to prevent drying and premature aging of the lips - lip balm is applied after prolonged exposure to the sun, or before going out to the sub-zero temperatures; In order to remove dead skin after applying - lightly massage your lips; In order to improve the state of the lips in the morning and prevent from micro-cracks in the corners of the lips - apply balm before going to bed; 2-3 times a week, apply the lip balm, in 2 minutes, to remove dead skin cells from the surface of the lips massage the substance with circular movements. Then wash your lips, blot with the tissue and again once again apply a lip balm without removing it.
Main components
Neovitin Bio-antioxidant complex Neovitin comes from original technology of the cultivated strains of biotechnological method from the ginseng biomass. The new technology allows achieving the most complete extraction of the complex without losing its antioxidant activity. Bio-antioxidant complex Neovitin is anti-inflammatory and has immune stimulatory effects. Synergistic effect of the active components of the complex leads to the production of antioxidant enzymes in the body and interferon, which inhibit the reaction of peroxide oxidation (destruction) of lipid cell membranes of blood vessels whilst strengthening them, and thereby increasing the resistance of the body. Neovitin controls the formation and leads to the physiological formation of the main instigators of premature aging - free radicals, which are developed of throughout human organism life. It is also the main agent to neutralize free radicals. The complex is stable during its storage period and has a high, penetrating ability through the epidermis, dermis and mucous membrane. It has been proved: Neovitin has anti-inflammatory and regenerative effects, which result in its widest application in anti-aging skin and health care products and oral care. The unique properties of Neovitin have been confirmed by 11 patents and awarded gold medals RANS with the name of II Mechnikov "For a practical contribution of improving the health of the nation" and Paul Ehrlich of the European Commission for Academic awards "for outstanding achievements in the field of social and predictive medicine".
