

MASCARA PEPTIDE LASHES® (BROWN)

	❖ Decorative Peptide Cosmetics ❖ Mascara (brown) ❖ PEPTIDE LASHES®
	Vendor code: 61002
	<u>BUY MASCARA (BROWN)</u>
Description	
Mascara PeptideLashes® provides even, thorough coverage for eyelashes and beautifully colors your eyelashes from root to tip which is maintained throughout the day, does not smudge. Creates an incredible amount of volume. Mascara is based on - a new, innovative formula with excellent properties, which create a deep and expressive eye look and an amazing shape and volume for eyelashes. Eyelashes look unusually lush with a deep black color. Gives your eyes a glamorous makeup. Contains peptides - from cartilage.	
Benefits:	
• strengthens eyelashes and helps them to grow, • provides a very even color intense brown color.	
Ingredients	
Purified water, peptide complex A-4, bidens extract, Talc, Cyclopentasiloxane, polipropilsilskvi-oxa, CI 77499, candelilla wax, polyvinylpyrrolidone-vinyl acetate copolymer, sorbitanizostearat, hydrogenated castor oil, ceresin, beeswax, cetyl alcohol, carnauba wax, kaolin, polyvinylpyrrolidone, stearin, cyclomethicone, bioantioxidant complex "Neovitin» ®, phenoxyethanol with ethylhexylglycerin, cellulose, hydroxyethyl cellulose, Perfume, triethanolamine, citric acid.	
Application method:	
Apply evenly throughout the length of the eyelashes from the base to the tips of the lungs tighten movements. In the case of contact with eyes, rinse with water. Applying mascara is very simple, and these tips will help you to create a clean, elegant image.	

- To make the amount of light apply mascara zigzag motion, starting from the base of the lashes to the tips.
- To make the extension Tint eyelashes lashes from the middle to the tips slowly, continuously, horizontally.
- To add a bend to fix the brush tips of eyelashes and gently press down, twirling them. After keeping the brush in that position for 10-15 seconds, remove it upwards - it will fix the shape of eyelashes.

If the brush after repeated use is as massive, just wipe the tip on a towel or piece of cloth.

Always apply mascara on the underside of the upper eyelashes, otherwise eyelashes will look burdened.

It is important to keep the brush clean, so wash it in soapy water once a week.

Do not use an excessive amount of mascara to avoid burdening the massiveness and eyelashes. In many cases it is sufficient to apply one coat of mascara, and should stop immediately when you see the appearance of clots. If you want to apply two coats for a more dramatic look, let mascara dry before adding the second layer. Repeated application of mascara on the same day over morning layer can also lead to clots. So if you want to update your makeup at night, remove the old ink before re-use.

Main components

Neovitin

Bio-antioxidant complex Neovitin comes from original technology of the cultivated strains of biotechnological method from the ginseng biomass. The new technology allows achieving the most complete extraction of the complex without losing its antioxidant activity. Bio-antioxidant complex Neovitin is anti-inflammatory and has immune stimulatory effects. Synergistic effect of the active components of the complex leads to the production of antioxidant enzymes in the body and interferon, which inhibit the reaction of peroxide oxidation (destruction) of lipid cell membranes of blood vessels whilst strengthening them, and thereby increasing the resistance of the body. Neovitin controls the formation and leads to the physiological formation of the main instigators of premature aging - free radicals, which are developed of throughout human organism life. It is also the main agent to neutralize free radicals. The complex is stable during its storage period and has a high, penetrating ability through the epidermis, dermis and mucous membrane. It has been proved: Neovitin has anti-inflammatory and regenerative effects, which result in its widest application in anti-aging skin and health care products and oral care. The unique properties of Neovitin have been confirmed by 11 patents and awarded gold medals RANS with the name of Il Mechnikov "For a practical contribution of improving the health of the nation" and Paul Ehrlich of the European Commission for Academic awards "for outstanding achievements in the field of social and predictive medicine".
