	<u>BUY ACTIMAN</u>
Description	
Multi-product, which improves male genitourinary system. Improves trophic processes in the prostate, testis and epididymis. Reduces congestion and inflammation in the pelvic organs. Slows down the growth of the prostate adenoma.	
Directions	
Adults: 1 capsule twice a day with food. Course duration: from 14 to 30 days	
Ingredients	
Extracts of pumpkin seeds, bark of prunus africana, flowers of cactus opuntia, bark of yphimbe, muira-puama, palmetto, epidemium; carnitine, acetyl-L-carnitine, coenzyme Q10	
Recommended application:	
• erectile dysfunction, • chronic congestive prostatitis, • prostate adenoma, • decreased libido, • premature ejaculation, • decline in the quality of the ejaculate, • infertility, • prevention of prostate cancer.	
Main components	
Pumpkin seed extract is a natural source of vitamins A and E, phospholipids, lecithin, carotenoids and polyunsaturated fatty acids. Vitamin A helps to improve vision. Vitamin E	

neutralizes free radicals and prevents the development of cancer. Phospholipids have a hepatoprotective effect, normalize carbohydrate and lipid metabolism. Lecithin restores the function of kidneys and liver, prevents cirrhosis, improves the condition of the skin, promotes rapid regeneration of the epithelium, has a cleansing effect on the skin and controls sebaceous glands. Pumpkin seed extract reduces the amount of lipids in the blood plasma. Furthermore, patients with prostatitis and benign prostatic hyperplasia (BPH) restores urination, thereby reducing the pain.

Form release:

30 capsules of 0,39 g
