

REVILAB SL 07 - peptide preparation for the hematopoiesis system

	❖ Peptides ❖ Revilab peptides ❖ Revilab SL 07 ❖ Peptides of B-cell branch of immune system, bone marrow and vessel wall Vendor code: 61507 <u>BUY REVILAB SL 07</u>
Description	
Peptide preparation for the hematopoiesis system. It contains synthesized peptides of B-cell branch of immune system, bone marrow and vessel wall.	
Purpose:	
• anemia of different genesis • disorder in hematopoietic system • treatment of the oncological patients • in cases of varicose veins • arterial hypertension	
Ingredients	
Purified water, chamomile extract, xylitol, PEG-40 hydrogenated castor oil, orange essential oil, taxifolin, licorice extract, propolis extract, peppermint extract, sodium saccharin, peptide complex AA-4, peptide complex AA-7, peptide complex AA-3, potassium sorbate, sodium benzoate, clove essential oil, natural flavor "Menthol", folic acid (vitamin B9), vitamin B12 (cyanocobalamin), eugenol, limonene.	
Main components	
• Peptide of B-cell branch of the immune system (AA-3) It influences on the cellular and humoral immunity and nonspecific resistance of the organism. It stimulates the regeneration process in the case of depression, and improves the	

processes of cell metabolism.

- Peptide of bone marrow (peptide complex AA-4)

It restores the hematopoietic system and also has an anti-anemic effect. The peptide of bone marrow stimulates the processes of tissue regeneration, tissue-specific proteins synthesis, proliferative and metabolic activity of cells. It accelerates healing of wounds and activates the functions of connective tissue cells, endotheliocytes, macrophages and leucocytes. It has antioxidant and immunostimulatory properties.

- Peptide of the vascular wall (peptide complex AA-7)

It regulates metabolic processes in the vascular wall. It can increase the elasticity of blood vessels and also can decrease the risk of damage to the vessel wall, bleeding and trombogenicity. Peptide complex AA-7 improves blood circulation of organs and tissues.

- Extract of licorice

Has a wide range of substances useful to the human body. 27 flavonoids in the licorice have a versatile effect on the body — both spasmolytic, wound healing, and anti-inflammatory.

- Extract of propolis

Suppresses activity and kills bacteria and viruses, slows the growth of some of them. Propolis struggles with oral diseases caused by various types of infections, including herpetic, fungal, bacterial nature.

- Peppermint extract

Contains essential oil, flavonoids, tannins and bitter — these are the main active ingredients of this plant. The most important component in essential oil is menthol (up to 60%), which has an easy local anesthetic effect.

- Chamomile extract

Has a strong bactericidal, anti-inflammatory and soothing effect, and also stimulates blood circulation. These properties made chamomile an indispensable tool in the treatment of various inflammatory processes.

- Essential oil of orange

Used to care for the oral cavity. Oil fights inflammation and bleeding gums, treats stomatitis, helps with periodontitis.

- Carnation essential oil

Used to care for the oral cavity. Oil fights inflammation and bleeding gums, treats stomatitis, helps with periodontitis.

Directions

Drip 5–10 drops on the oral mucosa. Use 2 times a day. Check presence of natural sediment. Shake before use. Receiving duration: one month.

Form release:

10ml
